The Water Walker

By Joanne Robertson

Fun Fact

All living things on Earth need water to survive.

Did You Know?

Water strider insects can walk on water. They are light and have special water-resistant hairs on their feet. Their legs repel water as they glide, so they don't sink!

Riddle Me This!

Q What do these things have in common?

A Water that flows in a river can be converted into hydroelectricity. It is a renewable source of energy.

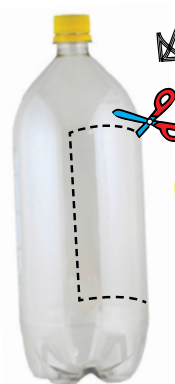

NATURE SEARCH

Go on a nature hike! How many of the things on the list can you check off?

- ☐ Find a smell you like.
- ☐ Find a smell you don't like.
- ☐ Point at something an animal would eat.
- ☐ Spot an animal or bug.
- ☐ Find something smooth.
- ☐ Find something bumpy.
- ☐ Listen for a bird.
- ☐ Listen for a mammal.
- ☐ Find something that snaps.
- ☐ Point at something that lives in water.
- ☐ Find something that lives in a tree.
- ☐ Point at something with a circle shape.

We chickens can look up with one eye and down with the other at the same time! Can you?

TRY THIS!

Make an underwater viewer with a recycled bottle. Ask an adult to cut a rectangle out of the side of a 2L plastic bottle. With an adult's help, dip the bottle into a shallow pond and look through the rectangle viewer to see what's underneath the surface.
