

transporting you to 2050 and the future
chickens guarama pockets in three 2
[Music]
one MC egg on the mic one two one two
chilling on the Tundra with my cool
caribo I'm
a come on and that take was perfect G
until the Caribou interrupted me well it
was okay but it could have been snappier
yeah okay I get it all right all right
bet you can't do better thought you'd
never ask pass the mic and bring that
beat Back DJ Rocky
P future SE in the forest there's no
cooler fresh like a stream going to make
you
drer commencing rap
battle well you're pecking at bugs I'm
laying the beat like honey from the
hives I'm deeping it
sweet oh that could have been a viral
hit but nature keeps
interrupting not you to loons I'm done
for today let's bounce and head back to
the bio Barn I'm with you besides we
have a visitor coming today Joe whale oh
yeah the artists who can't stop doodling
can't wait to meet
[Music]
Joe
hey fata and potato oh I mean MC egg and
Futures see how did your recording
session go hi there circuitry we were
out in nature trying to write a song
about nature but it turns out nature is
really really
noisy can't keep a healthy habitat quiet
come say hello to the planet protectors
who have tuned in to the biobor from
their present hi Planet protectors hello
so glad you time Twisted to hang out
with us in the year 2050 you'll see that
things are a little different in the
future our grasshoppers are Greener the
sky is Bluer and the Earth is in
recovery from some tough times for the
environment keep up all the good work
you've been doing to help the planet
warming up my roots to connect with Joe
well ready to time twist Joe on your
portal screen roots are revved and ready
to go opening portal in 3 2
[Music]
1 hello hi hi I'm Jo wh nice to meet you
I'm fata AKA MC
egg and my name is potato but sometimes
my friends call me taters or future sea
do you have a nickname you go by too so
my real name is Joel but um aka the
Doodle boy I guess that's my kind of
artist name Doodle boy I like the sound
of that how old were you when you
started drawing DB and how old are you
now I'm 13 now um I started really like
dueling and doing like a cartoon style
when I was about seven or eight and
that's just carried on until until now I
guess yeah 13 wow that's like 43 and EG
years I am positive that is not how egg
aging works I've noticed that some of
the creatures you draw look like animals
so I have to ask do you doodle any

chickens well it's actually quite fun
drawing chickens and stuff yeah I like
to draw them bub brilliant now Joe some
of your Doodles are about the
environment how does nature Inspire your
art well I think when I'm drawing I
always like to look around me and um
imagine what the world could be and I
think nature is a really really
important part of this world and I think
it's just a really happy thing that I
draw and I just really like to include
lots of Nature and art so you get
inspired by the nature around you not uh
interrupted by it hm maybe we can think
about nature that way the next time we
work on our

[Music]

song well let's play a game with Joe to
jump start our creativity imagine that
you are taking a walk in nature picture
the place in your mind got it now I'm
going to say that you spy something you
tell me what it is ready yes here we go
you are taking a walk in nature and you
spy something wild what is it a massive
tiger now you spy something
blue the big blue sky then you spy
something sticky
a massive spider with its we between two
trees extra sticky and finally you spy
something that
flies a massive
pork or maybe a
chicken I can kind of fly but not as
well as a
hawk well thanks for playing our game

[Music]

Joe you know you're a reminds me of how
things in nature are connected Joe each
small doodle is important to the bigger
picture do you draw that way yeah i' say
definitely I focus on like one little
character and then I just go from one to
the next so each character really helps
me figure out the next and when it
builds a bigger doodle that's full of
characters it really helps to start off
of just one that connects to every
s amazing there are so many things like
that small things that come together to
be something bigger small notes go
together to become a
song and kids join together to make a
movement that can change the world take
a look around you Planet protectors what
little things join together to make big
things Joe what do you say to kids out
there who want to use their creative
voice to make a difference in our world
well definitely just do what you love
and practicing it and if it's something
you're really passionate about reach out
to others and try and like spread the
word and show them what you're doing and
try and Inspire them as well so that's
kind of what I'm trying to do we're
trying to inspire people too fata and I
are using our creativity to make a hit
song about
nature with some help from DJ Rocky
p and talking to you is giving us some
new ideas but first back to your art you

you put your imagination to work and created the character Super Robot tell us about him Joe he's like a really cool robot that goes around the world saving people and creating a better world hey Planet protectors use your creativity to imagine Super Robot while we describe him starting from the top Super robot's head is rectangular with an antenna his body is an even bigger rectangle with the letters Sr for super robots normally he has like a radar on his chest and when he presses it he can figure out what sort of bad things are happening around the world so you can just teleport and help out there built-in radar nice classic robot hero gear I have two of them you're definitely pretty Super Rocket pants and like you Super Robot can fly too and Super Robot has extending arms and legs ideal for playing rock paper scissors together right so Planet protectors hopefully you have a picture of Super Robot in your mind now Joe was there something that inspired you to come up with the idea for Super Robot it would be really good to see and it is really good to see lots of people helping out in the environment and I thought it'd be really cool to create a character that can do that and you know sorting out pollution and things like that it's so cool that your character is inspired by real world people helping the environment oh we love hearing about kids who use their skills to protect the Earth the other day I heard about a girl who wrote software to predict wildfires and did you hear about the kids cleaning Plastics from the oceans with so many kids helping the Earth there are tons of people to be inspired by I want to ask you more about your Doodles your work is so detailed what do you do when you want to make a change normally if I want to make a change I'd stop what I'm doing i' think about about what I've done instead of like well I can't rub it out because I normally use marker I just really try and create something else out of it and sort of make fun of the challenge oh so any mistakes just become a part of your art in my art I don't think of mistakes as mistakes I just think of them as opportunities really to create a new character I love that kind of thinking it's not a mistake it's just an opportunity to try something new let's try out with our song Maybe the sounds of nature aren't interruptions they are opportunities to make the music more interesting bck I think you're on to a big idea fata we won't let interruptions stop us we let them Inspire us like this setting the track take three all the cool Caribou say hey all the loons on the lake say hey hey join in Planet protectors all the cool Caro say

hey all the loons on the lake say hey
hey
hey awesomely inspiring fata thanks I
definitely feel my Creative Juice is
Flowing now or was that my Yol thanks
for talking to us today Joe yeah thanks
Joe let's design a
best
bye
oh meeting Joe whale has got me thinking
about being inspired by Nature yeah our
new song doesn't have to be about how
cool we are it can be about how great
the world around us is we can let nature
sing for itself yeah what better way to
inspire others to connect with nature I
like what this idea is going many
artists musicians and writers are
inspired by Nature I love reading
stories about nature you know a very
influential nature writer started a
movement to prevent the use of poisonous
pesticides her writing made people
realize the impact they have on the
natural world oh who's that Rachel
Carson she published her first story
when she was only 11 years old amazing
tell me more about her Rachel Carson
became a scientist in college and she
combined her love of all living things
with her skill as a writer she explained
complicated things in a way that people
could understand once people started to
care about nature they began to take
care of nature oh that's so important
people with an emotional connection to
Nature are more motivated to protect it
I wish we could experience the nature
that inspired Rachel Carson I can help
you do that revving my roots to time to
a you to the coast of Main in
1963 my roots are revved and ready for
portal opening in 3 2
1 let's let's
go tough
Landing I wasn't expecting the shore to
be so
Rocky something just pinched me hey
watch where you're sitting so sorry crab
we weren't expecting to bump to anyone
well this beach is usually pretty empty
hey who's that over there gazing out at
the o I oh that's Rachel whoa Rachel
Carson what's she doing just standing
over there she loves the seashore so she
comes here for some peace and quiet her
life has gotten a little hectic H do you
know why her life is hectic rocket pants
searching
database according to her biography
chemical companies are angry about
Rachel's book they say that the
pesticides they are selling will only
poison insects and protect crops
Rachel's writing raised the alarm that
the chemical will spread and eventually
poison everything including people we're
all connected that's why chemicals in
one insector plant can spread to us all
people reading the book are so upset
about the chemicals that the president
of the United States got even more
scientists involved they confirmed

Rachel's findings are true Rachel
usually spends her time quietly but now
everyone wants to talk to her I'm
feeling like we shouldn't interrupt her
you're right for Tata I'm feeling
inspired to work on her song right now
let's fill it with all the sounds of
nature from around here in the bio Barn
so everyone around here can hear
them nature nature all around listen to
The Sounds we found we do our best to
protect this
world um what rhymes with worldwi
swirled pearled I don't know let's go
home and figure it out with another
Forest jam session circuitry can you
bring us back please sure thing potato
and fata
thanks for hanging out with us Planet
protectors yeah thank
you my roots are revved and ready
returning in 3 2
1's let's
go see you later crap
buddy my friends are never going to
believe this their music was kind of
catchy
[Music]
